

TEJAS RAVINDRA PATIL AI DATA ENGINEER

tejaspatil53@gmail.com | +91 8805647060 | [linkedin.com/in/tejaspatil53](https://www.linkedin.com/in/tejaspatil53) | github.com/tejaspatil98 | tejaspatil98.github.io | Nashik, India

Summary

AI & Cloud Data Engineer with ~6 years of experience building scalable data platforms for global telecom, transportation and manufacturing clients on Snowflake, Azure and AWS. Built 250+ production pipelines across 35+ source systems, orchestrated 60 workflows at StarHub, and raised on-time job success to 95%. Now building RAG- and ML-ready data pipelines, client PoCs and product features on xLytix, an AI data enablement platform.

Professional Experience

UXLI LIMITED

10/2020 – Present | Hyderabad, India (Remote)

Consultant - Data and AI Engineering

10/2025 – Present

- Drive the evolution of xLytix, an AI-powered data enablement platform, through product validation, real-world use-case testing, gap analysis and feature recommendations.
- Build client-specific, end-to-end AI data engineering PoCs (ingestion, transformation, modeling, RAG and ML-ready pipelines, dashboards) across FMCG, Pharma, Manufacturing and Financial Services.
- Pitch and deliver tailored demos, turning business requirements into customized datasets and workflows within ~2-week pilots.
- Partner with product and engineering to surface bugs, usability gaps and missing capabilities, improving platform scalability and enterprise readiness.

Senior Data Engineer

06/2023 – 09/2025

- Delivered end-to-end data engineering for StarHub's Customer 360 platform with architects, client stakeholders and program managers across a multi-vendor ecosystem, from requirements to go-live.
- Re-engineered ingestion from 35+ source systems (MySQL, SQL Server, Oracle, PostgreSQL, SFTP, S3, Salesforce) during the Netezza-to-Snowflake migration, building full, incremental and deduplication pipelines on Data Pipes (Airbyte-based).
- Orchestrated 60 workflows, 250+ pipelines and 820+ objects (tables, files, Snowflake Tasks running stored procedures) with series/parallel dependencies, source-completion triggers and schedules from every 30 minutes to monthly.
- Led 2 months of production performance testing before go-live, isolating Data Pipes infrastructure bottlenecks; re-initiated pipelines, backfilled production data and lifted on-time job success to 95% (loads that took hours now finish in minutes).
- Co-Designed the Snowflake Raw, Modelled and Information layers and contributed 120+ Data Pipes enhancements from gaps found in testing.

Cloud Data Engineer

03/2022 – 05/2023

- Engineered a cloud-native warehouse modernization for Vodacom (South Africa), migrating on-premises workloads to AWS for contact-center and operational analytics.
- Built metadata-driven ETL and orchestration frameworks with Glue, PySpark, S3, Redshift, Lambda, Step Functions and EventBridge for reusable, scalable processing.
- Developed reusable data-loading adapters and automated Redshift stored-procedure execution, with dependency management, error handling and batch recovery.
- Concurrently supported Transport for Wales Rail (UK): built new pipelines, resolved production issues and maintained Azure integration workloads.

Software Engineer Trainee

01/2021 – 03/2022

- Helped build the Azure data platform for TfW Rail (Wales, UK) from inception, powering web, ticketing and performance analytics.
- Co-designed a configuration-driven Azure Integration Framework on dynamic ADF pipelines, centralizing orchestration, auditing and error handling.
- Created reusable pipeline patterns that cut manual code maintenance and enabled low-code onboarding of new integrations.
- Developed daily ETL/ELT pipelines from Cosmos DB, ADLS Gen2, PostgreSQL and SFTP into Synapse for KPI reporting.
- Tested and maintained Python REST APIs on Azure Web Apps/Functions; led production troubleshooting and data-flow documentation.

Intern

10/2020 – 12/2020

- Built SQL queries and managed databases (PostgreSQL) for PoC projects.
- Gained initial exposure to Cloud Technologies (AWS, Azure, GCP) and web technologies (HTML, CSS, JS)

Technical Skills

Languages & Frameworks: Python, SQL, PySpark, Pandas, NumPy, Scikit-learn, PyTorch, Hugging Face, LangChain

Data & Cloud Platforms: Azure (ADLS Gen2, ADF, Synapse, Cosmos DB, Functions), AWS (S3, Glue, Lambda, Step Functions, Redshift), Snowflake (Snowpark, Tasks, Streams)

AI & Data Engineering: GenAI, RAG, LLMs, MLOps/ML Pipelines, ETL/ELT, Data Modeling, Data Warehousing, Orchestration

Open Source Tools & DevOps: Apache Spark, Airflow, DBT, Airbyte, ClickHouse, Apache Superset, Git/GitHub, Azure DevOps, CI/CD, Postman

Certifications

SnowPro Core: Snowflake Inc. | **Oracle Cloud Infrastructure Generative AI Professional:** Oracle |

Microsoft Azure Data Fundamentals: DP-900: Microsoft | **Microsoft Azure Fundamentals: AZ-900:** Microsoft

Projects & others

- **Intelligent-Loan-Approval-System** | Built an end to end supervised ML Pipeline using KNN, Logistic Regression and naive bayes to predict loan approval. implemented binary classification along with EDA, feature engineering & Model Evaluation (Precision, recall, F1)
- **FoodDelivery-AI-Data-Engineering-End-To-End-Project** | ELT pipeline that ingests AWS S3 data into Snowflake using Airflow and transforms it through a 3-tier dbt medallion architecture. Integrated OpenAI layer to power LLM review enrichment, RAG chat, and text-to-SQL capabilities.
- **Awards** | Recognised with "Rising Star of the Year" (2021) and multiple "Star of the Month" honors during ongoing tenure at UXLI Limited
- **Languages** | English (Full Professional) | Hindi & Marathi (Native) | German & French (Elementary)

Education

Bachelors of Engineering (Mechanical)

07/2016 – 07/2020 | Pune, India

Savitribai Phule Pune University (CGPA: 8.37/10 - First Class with Distinction)
