

# TEJAS RAVINDRA PATIL AI DATA ENGINEER

+91 8805647060   tejaspatil53@gmail.com   /tejaspatil53   /tejaspatil98   Portfolio   Nashik, India

## Summary

AI & Cloud Data Engineer with 5.5+ years of experience delivering scalable data and AI solutions for global clients across Telecom, Transportation, Manufacturing, and Technology. Built 250+ production data pipelines across 35+ source systems using AWS, Azure, and Snowflake, with expertise in Data Engineering. Currently contributing to xLytx—an AI-powered data enablement product—driving client pilots, PoCs, and AI data engineering projects (RAG-based ML data pipelines), product improvements, and feature innovation.

## Professional Experience

### UXLI LIMITED

10/2020 – Present | Hyderabad, India (Remote)

#### Consultant - Data and AI Engineering

10/2025 – 10/2026

- Contributing to the evolution of xLytx, a unified AI-powered data enablement platform, through product validation, real-world use-case testing, gap analysis, and feature recommendations.
- Building client-specific end-to-end AI data engineering PoCs, including data ingestion, transformation, modeling, AI-ready RAG based and ML data pipelines, analytics, and dashboards across FMCG, Pharma, Manufacturing, and Financial Services domains.
- Pitch and deliver tailored product demonstrations while engineering customized datasets and workflows to translate business requirements into rapid ~2-week pilots and PoCs that showcase platform capabilities.
- Working with product and engineering teams to identify bugs, usability gaps, missing capabilities, and new feature requirements, helping improve platform scalability, usability, and enterprise readiness.

#### Senior Data Engineer

06/2023 – 09/2025

- Contributed to end-to-end data engineering delivery for StarHub's Customer 360 platform, collaborating across multi-vendor ecosystems along with data architects, client stakeholders, and program managers across requirements, design, development, and implementation.
- Supported migration from IBM Netezza DWH to Snowflake and re-engineered upstream ingestion from 35+ source systems including MySQL, SQL Server, Oracle, PostgreSQL, SFTP, AWS S3, and Salesforce; designed and developed 250+ full, incremental, and deduplication pipelines using Data Pipes (Airbyte-based ETL/ELT tool)
- Helped in designing and implementing Snowflake Raw, Modelled, and Information layers, transforming raw data into standardized telecom data models, facts, dimensions, and business views, with Snowflake Tasks, schedules, and dependencies orchestrating.
- Contributed to the evolution of Data Pipes tool by identifying product gaps & operational issues, contributing to 120+ features/enhancements, and supporting performance testing and monitoring that improved platform efficiency to ~95%.

#### Cloud Data Engineer

03/2022 – 05/2023

- Engineered a cloud-native data warehouse modernization solution for a global telecom client - Vodacom (South Africa), migrating legacy on-premises workloads to AWS for contact-center and operational analytics.
- Built metadata-driven ETL and orchestration frameworks using AWS Glue, PySpark, S3, Redshift, Lambda, Step Functions, and EventBridge, enabling reusable and scalable data processing.
- Developed reusable data-loading adapters and automated Redshift stored-procedure execution, implementing dependency management, error handling, batch recovery, and automated workflow orchestration.
- Concurrently supported the Transport for Wales Rail (UK) engagement by overseeing new pipeline development, troubleshooting production issues, and maintaining existing Azure data integration workloads.

#### Software Engineer Trainee

01/2021 – 03/2022

- Contributed towards the Azure data platform from inception for TfW Rail (Wales, UK), powering web, ticketing, and performance analytics systems.
- Help designed a unique configuration-driven Azure Integration Framework using dynamic ADF pipelines to centralize orchestration, auditing, and error handling.
- Built reusable pipeline patterns that minimized manual code maintenance and enabled rapid, low-code onboarding of new data integrations.
- Developed daily ETL/ELT pipelines to ingest data from Cosmos DB, ADLS Gen2, PostgreSQL, and SFTP into Synapse for KPI reporting.
- Tested and maintained Python REST APIs on Azure Web Apps/Functions, while leading production troubleshooting and data flow documentation.

#### Intern

10/2020 – 12/2020

- Built SQL queries and managed databases (PostgreSQL) for PoC projects.
- Gained initial exposure to AWS, Azure, GCP, and web technologies (HTML, CSS, JS)

## Technical Skills

**Languages & Frameworks:** Python, SQL, PySpark, Pandas, NumPy, Scikit-learn, PyTorch, Hugging Face, LangChain

**Data & Cloud Platforms:** Azure (ADLS Gen2, ADF, Synapse, Cosmos DB, Functions), AWS (S3, Glue, Lambda, Step Functions, Redshift), Snowflake (Snowpark, Tasks, Streams)

**AI & Data Engineering:** GenAI, RAG, LLMs, MLOps/ML Pipelines, ETL/ELT, Data Modeling, Data Warehousing, Orchestration

**Open Source Tools & DevOps:** Apache Spark, Airflow, DBT, Airbyte, ClickHouse, Apache Superset, Git/GitHub, Azure DevOps, CI/CD, Postman

## Certificates

**SnowPro Core:** Snowflake Inc. | **Oracle Cloud Infrastructure Generative AI Professional:** Oracle |

**Microsoft Azure Data Fundamentals: DP-900:** Microsoft | **Microsoft Azure Fundamentals: AZ-900:** Microsoft

## Projects & Awards

- Intelligent-Loan-Approval-System** | Built an end to end supervised ML Pipeline using KNN, Logistic Regression and naives bayes to predict loan approval. implemented binary classification along with EDA, feature engineering & Model Evaluation (Precision, recall, FI)
- FoodDelivery-AI-Data-Engineering-End-To-End-Project** | ELT pipeline that ingests AWS S3 data into Snowflake using Airflow and transforms it through a 3-tier dbt medallion architecture. Integrated OpenAI layer to power LLM review enrichment, RAG chat, and text-to-SQL capabilities.
- Awards** | Recognised with "Rising Star of the Year" (2021) and multiple "Star of the Month" honors during ongoing tenure at UXLI Limited

## Education

### Bachelors of Engineering (Mechanical)

2016 – 2020 | Pune, India

Savitribai Phule Pune University ( CGPA: 8.37/10 - First Class with Distinction)
